Features of Forbes Racks

Crimped and formed ends. No protruding tube ends to gouge walls

Bumpered back bar to protect walls

Strap ends have galvanized steel clips that are crimped, glued and attached with screws to the steel tube

Steel rivets at pivot points provide a more durable connection than other types of hardware

STEEL RACKS

The combination of compression resistant hardwood, steel rivets at pivot points and lower cross braces provide a more durable rack able to handle heavy loads.

Bumpered back bar protects walls

HARDWOOD RACKS
